- Latest Q Switch Laser Technology Nd:YAG
- Customised Laser Tattoo Removal
- Complete and Partial Tattoo Removal
- Tattoo Fading for Cover Ups
- Colours Safely and Effectively Removed
- Radiation Health Queensland Licenced

ERAZALASER uses the latest Q Switch Nd:YAG laser which is widely considered the gold standard method to remove a tattoo. During treatment, the laser beam passes harmlessly through your skin, targeting only the tattoo ink. The ink is broken-down and removed by your lymphatic system and the tattoo fades gradually over time.

Modern Class 4 lasers have made tattoo removal more effective, more comfortable, more affordable and less invasive. ERAZALASER clinicians are fully licenced by Radiation Health Queensland and have undertaken Master level training in tattoo removal.

Our treatments include complete tattoo removal or partial removal for those who wish to modify their tattoo by only removing some parts. We can also fade an existing tattoo before it is covered with another tattoo. Most tattooists recommend fading as it gives them more scope with the new tattoo.

As it takes time for your body to dispose of the unwanted ink, treatments are scheduled in intervals of 4 – 6 weeks. Depending on your body's response, ERAZALASER will develop a treatment plan that is both effective and economical for you.

Laser tattoo removal pricing is dependent on size, colour, location, and other factors of your tattoo. ERAZALASER will need to assess your tattoo, estimate the number of treatments and determine the laser removal cost so as to customize the best laser removal plan for you.

## ERAZALASER CLIENTS ARE HAPPY TO SHARE THEIR OPINIONS AND EXPERIENCES.

Visit our website for more reviews.

"Having had treatments at other clinics and having a treatment with Chris it is obvious he knows his stuff, from the consult to treatment and aftercare the level of service and knowledge is better than I have had before. I wouldn't hesitate in recommending him to anyone. Thanks Chris." *Emma*

"To say I was 'freaking out' about the pain was an understatement. However, from the moment I walked in to the clinic, Chris the laser technician made me feel at ease with his professional, friendly and most importantly soothing manner. He was very thorough in his explanation of the procedure about to take place and the after care of the newly lasered tattoo. As advised by Chris, the pain wasn't half as bad as I had imagined it would be and the treatment was over in a few minutes. Not only was I impressed by the sterile environment and super friendly professional customer service, the results were awesome." *Robin*

"Professional and amazing technology and service. Chris assisted me all the way through and answered all questions I had. I'm simply blown away at how quick and pain free the removal was! Thanks again ERAZALASER." *Marky*

We understand that you may wish to carefully consider your decision to remove your unwanted ink and we encourage you to contact us at ERAZALASER for a confidential consultation. While we can help over the phone, ultimately we will need to sit down with you and discuss your treatment plan.
